

## MORGAN HILL, MATH Benchmark Assessments, 2010-2011, 5th Grade

| Order | Standard | Description   | CST ?s | y Asses |
|-------|----------|---|--------|---------|
| 1     | NS1.1    | Estimate, round, and manipulate very large (e.g., millions) and very small (e.g., thousandths) numbers.   | 1      |         |
| 2     | NS1.2    | Interpret percents as a part of a hundred; find decimal and percent equivalents for common fractions and explain why they represent the same value; compute a given percent of a whole number.  | 5      | Y       |
| 3     | NS1.3    | Understand and compute positive integer powers of nonnegative integers; compute examples as repeated multiplication.  | 1      |         |
| 4     | NS1.4    | Determine the prime factors of all numbers through 50 and write the numbers as the product of their prime factors by using exponents to show multiples of a factor (e.g., $24 = 2 \times 2 \times 2 \times 3 = 2^3 \times 3$ ).   | 3      | Y       |
| 5     | NS1.5    | Identify and represent on a number line decimals, fractions, mixed numbers, and positive and negative integers.   | 2      |         |
| 6     | NS2.1    | Add, subtract, multiply, and divide with decimals; add with negative integers; subtract positive integers from negative integers; and verify the reasonableness of the results.   | 7      | Y       |
| 7     | NS2.2    | Demonstrate proficiency with division, including division with positive decimals and long division with multidigit divisors.  | 3      | Y       |
| 8     | NS2.3    | Solve simple problems, including ones arising in concrete situations, involving the addition and subtraction of fractions and mixed numbers (like and unlike denominators of 20 or less), and express answers in the simplest form.   | 5      | Y       |
| 9     | NS2.4    | Understand the concept of multiplication and division of fractions.   | 1      |         |
| 10    | NS2.5    | Compute and perform simple multiplication and division of fractions and apply these procedures to solving problems.   | 1      |         |
| 11    | AF1.1    | Use information taken from a graph or equation to answer questions about a problem situation.   | 1      |         |
| 12    | AF1.2    | Use a letter to represent an unknown number; write and evaluate simple algebraic expressions in one variable by substitution.   | 6      | Y       |
| 13    | AF1.3    | Know and use the distributive property in equations and expressions with variables.   | 1      |         |
| 14    | AF1.4    | Identify and graph ordered pairs in the four quadrants of the coordinate plane.   | 4      | Y       |
| 15    | AF1.5    | Solve problems involving linear functions with integer values; write the equation; and graph the resulting ordered pairs of integers on a grid.   | 5      | Y       |
| 16    | MG1.1    | Derive and use the formula for the area of a triangle and of a parallelogram by comparing it with the formula for the area of a rectangle (i.e., two of the same triangles make a parallelogram with twice the area; a parallelogram is compared with a rectangle of the same area by cutting and pasting a right triangle on the parallelogram). | 2.5    |         |
| 17    | MG1.2    | Construct a cube and rectangular box from two-dimensional patterns and use these patterns to compute the surface area for these objects.  | 0.5    |         |
| 18    | MG1.3    | Understand the concept of volume and use the appropriate units in common measuring systems (i.e., cubic centimeter [cm <sup>3</sup> ], cubic meter [m <sup>3</sup> ], cubic inch [in <sup>3</sup> ], cubic yard [yd <sup>3</sup> ]) to compute the volume of rectangular solids.  | 3      | Y       |
| 19    | MG1.4    | Differentiate between, and use appropriate units of measures for, two- and three-dimensional objects (i.e., find the perimeter, area, volume).  | 1      |         |
| 20    | MG2.1    | Measure, identify, and draw angles, perpendicular and parallel lines, rectangles, and triangles by using appropriate tools (e.g., straightedge, ruler, compass, protractor, drawing software).  | 3      | Y       |
| 21    | MG2.2    | Know that the sum of the angles of any triangle is 180° and the sum of the angles of any quadrilateral is 360° and use this information to solve problems.  | 4      | Y       |
| 22    | MG2.3    | Visualize and draw two-dimensional views of three-dimensional objects made from rectangular solids.   | 1      |         |

## MORGAN HILL, MATH Benchmark Assessments, 2010-2011, 5th Grade

|    |         |   |      |   |
|----|---------|---|------|---|
| 23 | SDAP1.1 | Know the concepts of mean, median, and mode; compute and compare simple examples to show that they may differ.  | 0.33 |   |
| 24 | SDAP1.2 | Organize and display single-variable data in appropriate graphs and representations (e.g., histogram, circle graphs) and explain which types of graphs are appropriate for various data sets. | 0.33 |   |
| 25 | SDAP1.3 | Use fractions and percentages to compare data sets of different sizes.  | 0.33 |   |
| 26 | SDAP1.4 | Identify ordered pairs of data from a graph and interpret the meaning of the data in terms of the situation depicted by the graph.  | 2.5  | Y |
| 27 | SDAP1.5 | Know how to write ordered pairs correctly; for example, $(x, y)$ .  | 0.5  |   |
