

## **Datawise**

The MEASURES Suite gives you the "30,000 foot" overall picture of district-wide student achievement as well as the "face-to-face" close-up of individual classrooms and students.

The MEASURES Suite consists of MEASURES Aligned, a test automation module, MEASURES Applied Plus, a data warehousing and analysis module, and MEASURES Manager, the database administration and data quality maintenance module.

All of these modules are kept up to date by nightly automated roster and demographics update from our district SASIx system.
