

Give your child the gift of being bilingual!

Imagine your children becoming fluent in a second language in their early years. Imagine them not only speaking, but writing, reading, and learning in that language as comfortably as they do in their first language. Imagine them being ready to learn a third language by the time they enter high school. A gift like this will open doors throughout their lifetime.

Dual Immersion, or Two Way Immersion, teaches school subjects in both English and a target language, in this case Spanish. Language learning occurs best when students are surrounded by the new language while students learn math, social studies, and more. Students negotiate meaning further through interaction with their peers in a class made up of native speakers of both languages.

More than 40 years of research consistently documents the power of Dual Immersion programs to help students attain high levels of second-language proficiency. No other type of instruction is as successful, and young children thrive in this type of instructional environment.
